TECHNICAL SKILLS

Programming Language: C, Java, Python, SQL, MySQL, HTML, CSS, JavaScript

Tools & Framework: ReactJS, Typescript, NextJS, NodeJS, Spring Boot, DevOps, Git/GitHub, Azure

Operating Systems: LINUX, MacOS, Windows 10/11

EDUCATION

Bachelor of Science Honours Computer Science with Software Engineering Specialization Co-op Jan 2024 - May 2027

University of Windsor

Windsor, ON

Relevant Courses: Data Structure and Algorithms, Object Oriented Programming, Computer Architecture, System Programming, Software Development, Database Management, Operating Systems.

Certificate, Project Management Foundation

Sep 2023 – Dec 2023

University of Toronto

Mississauga, ON

Diploma, Computer Systems Technician

Sep 2019 - Apr 2021

Loyalist College

Belleville, ON

Relevant Courses: Database Management, Windows Server, Computer Networking (TCP/IP, Subnetting), Python Programming, Web Development.

EMPLOYMENT EXPERIENCE

IT Support Client Services – (Part-time)

Jan 2026 - Present

University of Windsor

Windsor, ON

- Delivered IT support to students and library patrons, resolving printing problems, hardware malfunctions, and account access issues
- Administered user accounts and password resets through Active Directory for library staff and patrons
- Assisted with VM configuration, system upgrades, and documented technical procedures

IT Support Client Services (Co-op)

Apr 2025 - Dec 2025

University of Windsor

Windsor, ON

- Provided technical support to staff by troubleshooting hardware, software, and network issues
- Supported **virtual machine environments**
- Assisted in user account management, password resets, and access control using Active Directory
- Documented technical procedures and maintained issue logs for recurring IT problems
- Supported system upgrades, software deployments, and inventory management tasks

PROJECTS

Fiscal | Hackathon 2026 Project | Next.js, React, TypeScript

- Developed responsive personal finance web application using Next.js, React, and TypeScript
- Built interactive dashboard featuring real-time expense tracking, budget management, OSAP calculator, and tax estimator
- Implemented client-side data persistence using React hooks and localStorage, ensuring complete user data privacy

Task Manager REST API | Personal Project | Java, Spring Boot, Spring Security, PostgreSQL, JWT

- Built a secure RESTful API with JWT-based authentication for stateless user session management
- Implemented full CRUD operations allowing users to create, update, and delete tasks with priority and status tracking
- Designed relational database schema using JPA/Hibernate with PostgreSQL for persistent data storage
- Applied layered architecture (Controller → Service → Repository) following industry-standard Spring Boot best practices
- Implemented global exception handling and input validation for clean and consistent API responses

Work Hours Tracker | Personal Project | JavaScript, HTML, CSS

- Designed and developed a browser-based application to track weekly work hours by person and workplace
- Implemented dynamic hour calculations and weekly summaries using JavaScript
- Utilized browser localStorage for persistent client-side data management without a backend
- Built responsive UI with structured input validation to improve usability and data accuracy

StudyFlow Pro | Full-Stack Productivity & Analytics App

- Built full-stack productivity app with task management, Pomodoro timer, and analytics dashboard
- Implemented Supabase RLS for secure, per-user data access and integrity
- Designed normalized database schema and responsive mobile-first UI with data visualizations
